

We are...on track

If you've got a urgent delivery, before you hit the panic button there's another button you should try - *i*-Track

As an Allied customer, you can give your customers immediate access to up-to-the-minute delivery tracking thanks to Allied's proprietary *i*-Track system.

Residing on your main website, an *i*-Track button is a hot-link directly into our tracking system where your end-customers, re-sellers or company branches can obtain an accurate location status of any delivery.

Allied's tracking system uses a sophisticated, powerful combination of scanned input and GPS tracking to establish a vehicle's location prior to delivery or provide verification once delivery has taken place. Should the need arise to go back and review a delivery, the data is accessible for up to three months from date of completion.

It's a service that we'll install for Allied clients and one that will prove invaluable to both you and your customers for maintaining your reputation as a reliable and timely supplier.

Contact your Customer Service Representative today to find out how *i*-Track can become a part of the way you do business.
